Fire Lighting Gel

Ideal for log burners,
coal fires & chimeneas

Barrettine
TRUSTED BY THE PROFESSIONALS

Instant Lighting

Low Odour

Clean to Handle

Directions for use

- Shake bottle well before use.
- The cap is applied at a certain torque for safety. If you find the cap difficult to remove, run the bottle neck under hot water for a minute or so and retry.
- For best results lay dry kindling wood in grate or hearth
- Squeeze out gel approximately golf ball size into the centre and then lay more kindling wood or small logs/coal over the top and light gel.
- More logs or coal can be added as required.
- Alternatively just place logs or coal into grate or hearth and squeeze gel all over and light. (By using this method you may require slightly more gel)

CAUTION: Never apply fire lighting gel onto hot or burning fires.
