DO NOT SELL TO PERSONS UNDER 18.

KNOCKOUT DRAINS, TOILETS & URINALS SPECIAL FORMULATION IS READY TO USE, AND WILL BREAK DOWN THE FATS, GREASE AND HAIR THAT COMMONLY CAUSE BLOCKAGES OR SLOW RUNNING WASTES, LEAVING WASTE PIPES CLEAN AND SANITIZED.

PLEASE READ THE INSTRUCTIONS BEFORE USE. DO NOT MIX WITH ANY OTHER CHEMICALS INCLUDING ANY OTHER KNOCKOUT PRODUCTS. USE IN WELL VENTILATED AREAS. NEVER USE A PLUNGER WITH THIS PRODUCT. REPLACE CAP IMMEDIATELY AFTER USE AND KEEP OUT OF REACH OF CHILDREN.

DO NOT USE IN SEPTIC TANKS,
TOILETS WITH MACERATORS OR WASTE DISPOSALS.

- **Drains, Toilet & Urinals (DTU)** is a caustic/sodium hydroxide based product designed to clear blockages caused by organic substances.
- Its chemical action dissolves grease, hair, soap, cooking fats and helps break down paper, tea bags, coffee grounds, waste matter etc.
- **Drains, Toilets and Urinals** should be compatible with most commonly used plastic pipes such as PEX/ Vulcathene - High-density polyethylene, PVC — Polyvinyl Chloride, but this product is not compatible with some plastics such as polycarbonate. If in doubt check with a qualified plumber before use. Barrettine cannot be held responsible for incorrect use or where the product affects poor joints/plumbing.

DIRECTIONS

- **Do not breathe in the fumes. Wear appropriate personal protective equipment (PPE) such as chemical resistant gloves, overalls and eye/face protection to protect against splashes. If in doubt speak, to your PPE supplier and show them this label/product, or call us for further advice.**
- Do not lean too close when using **Drains, Toilet & Urinals**.
- Use only in well ventilated areas. Never add water to this product.
- To remove cap, place bottle on solid surface, hold bottle, apply downward pressure to cap and rotate anti clockwise.
- After use replace cap tightly and keep out of reach of children.

FOR TREATMENT OF TOILETS & URINALS:

- **Remove as much water from the blocked toilet as possible but leave sufficient water to keep the u-bend filled before commencing treatment.**
- At this point inspect the toilet pan for defects, cracks, chips or glazing imperfections.
- **Dosage:** Pour between 500ml - 1 Litre into the toilet/urinal, ideally when pipe-work is not in use i.e. overnight. Alternatively allow to stand for a minimum of 1-2 hours before flushing/rinsing.
- In some instances you may have to use a plastic funnel and hose to introduce DTU. If the blockage is further round the toilet bend. **(Take extreme care if using this option).**
- When the blockage has cleared **flush through with cold water taking extreme care**, in case of splash-back. If for any reason the blockage does not clear **DO NOT use any other chemicals but consult a plumber and inform them of what you have used.**

FOR TREATMENTS OF OUTSIDE DRAINS:

- Pour 500ml - 1 Litre of DTU slowly into drain.
- When the water level drops the blockage is clear. If blockage is severe you may need to repeat using DTU after 1-2 hours (DO NOT ADD ANY OTHER CHEMICAL OTHER THAN **Drains, Toilet & Urinals**)
- When the blockage has cleared take extreme care when flushing through with cold water.

HEALTH & SAFETY INFORMATION

Contains: Sodium hydroxide; A mixture of: 2-ethylhexyl mono-D-glucopyranoside; 2-ethylhexyl di-D-glucopyranoside. Causes severe skin burns and eye damage. If medical advice is needed, have product container or label at hand. Keep out of reach of children. Wear protective clothing, eye protection, face protection, protective gloves. IF SWALLOWED: rinse mouth. Do NOT induce vomiting. Immediately call a POISON CENTER, a doctor. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. Immediately call a POISON CENTER, a doctor. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER, a doctor. Store locked up. Dispose of contents and container to a hazardous or special waste collection point.
