**NOT FOR SALE TO THE GENERAL PUBLIC UNLESS THEY HOLD AN EPP LICENSE.
DO NOT SELL TO PERSONS UNDER 18.
DO NOT USE THIS PRODUCT TO UNBLOCK BATHS, URINALS,
SHOWERS, BASINS OR KITCHEN SINKS.**

**KNOCKOUT SINKS, SHOWERS & BATHS SHOULD BE USED FOR UNBLOCKING
KITCHEN SINKS, BATHS & SHOWER WASTE.**

**PLEASE READ THE INSTRUCTIONS BEFORE USE. DO NOT MIX WITH ANY OTHER CHEMICALS
INCLUDING ANY OTHER KNOCKOUT PRODUCTS. USE IN WELL VENTILATED AREAS. NEVER USE
A PLUNGER WITH THIS PRODUCT. REPLACE CAP IMMEDIATELY AFTER USE AND KEEP OUT OF
REACH OF CHILDREN.**

- **Toilet & Drain** is a sulfuric acid based product designed to rapidly clear blockages caused by organic substances.
- Its chemical action breaks down and dissolves grease, hair, soap, paper, sanitary towels, tea bags, coffee grounds, waste matter, cooking fats etc.
- **Toilet & Drain** is almost twice the density of water, and therefore sinks quickly to the blocked area, where its powerful action starts to take immediate effect.

DIRECTIONS

Skin protection: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Recommended: corrosive chemical-resistant protective suit & gloves. Full face mask and eye protection. Do not breathe in the fumes.

- Do not lean too close when using Toilet & Drain.
 - Use only in well ventilated areas. Never add water to this product.
 - To remove cap, place bottle on solid surface, hold bottle, apply downward pressure to cap and rotate anti clockwise.
 - After use replace cap tightly and keep out of reach of children.
- FOR TREATMENT OF TOILETS (not urinals):** Remove as much water from the blocked toilet as possible but leave sufficient water to keep the u-bend filled before commencing treatment.
- At this point inspect the toilet pan for defects, cracks, chips or glazing imperfections as this product builds up heat and could cause damage to the toilet pan.
 - **Dosage:** Use between 250ml-500ml. Allow to stand for 10-15 minutes.
 - Pour Toilet & Drain slowly, and a little at a time, to avoid excessive heat build-up or pressure which could damage fittings or pipe work.
 - In some instances you may have to use a plastic funnel and hose to introduce Toilet & Drain if the blockage is further round the toilet bend. **(Take extreme care if using this option).**
 - When the blockage has cleared flush through with cold water taking extreme care, in case of thermal reaction or splash-back. If for any reason the blockage does not clear **DO NOT use any other chemicals, consult a specialist drain company and inform them of what you have used and where possible, a copy of this label.**

FOR TREATMENTS OF OUTSIDE DRAINS:

- Pour 250ml-500ml of Toilet & Drain slowly into drain to avoid excessive heat build-up or pressure which could damage fittings or pipe work.
- When the water level drops the blockage is clear. If blockage is severe you may need to add more Toilet & Drain after 30 minutes (DO NOT ADD ANY OTHER CHEMICAL OTHER THAN TOILET & DRAIN)
- When the blockage has cleared take extreme care when flushing through with cold water, in case of thermal reaction or splash-back.

HEALTH, SAFETY & ENVIRONMENTAL INFORMATION

Contains: Sulphuric acid

ANGER

Causes severe skin burns and eye damage. Keep out of reach of children. Do not breathe vapours, spray. Wear protective gloves, protective clothing, eye protection, face protection.
