**Barrettine**

**PLEASE READ THE INSTRUCTIONS BEFORE USE. DO NOT MIX WITH ANY OTHER CHEMICALS INCLUDING ANY OTHER KNOCKOUT PRODUCTS. USE IN WELL VENTILATED AREAS. NEVER USE A PLUNGER WITH THIS PRODUCT. REPLACE CAP IMMEDIATELY AFTER USE AND KEEP OUT OF REACH OF CHILDREN.**

**KNOCKOUT SINKS, SHOWERS & BATHS SPECIAL FORMULATION IS READY TO USE, AND WILL BREAK DOWN THE FATS, GREASE AND HAIR THAT COMMONLY CAUSE BLOCKAGES OR SLOW RUNNING WASTES, LEAVING WASTE PIPES CLEAN AND SANITIZED.**

## HANDLING INSTRUCTIONS

Wear appropriate personal protective equipment (PPE) such as chemical resistant gloves, overalls and eye/face protection to protect against splashes. If in doubt speak, to your PPE supplier and show them this label/product, or call us for further advice. Take extreme care when handling this product.

Remove as much waste as possible before using. Always pour liquid gently and as close to blockage as possible to avoid splashing but also to avoid getting the product into contact with the chrome fittings as there is a possibility of tarnishing. Sinks, Showers and Baths should be compatible with most commonly used plastic pipes such as PEX/Vulcathene - High-density polyethylene, PVC — Polyvinyl Chloride, but this product is not compatible with some plastics such as polycarbonate. If in doubt check with a qualified plumber before use. Barrettine cannot be held responsible for incorrect use or where the product affects poor joints/plumbing.

**BATHROOM: Hand basins, Baths and Showers trays:** The common cause of slow running/blocked wastes in bathrooms is hair and soap build up. **Sinks, Showers & Baths** will break down the blockage leaving clean and free flowing pipes. Gently pour 250ml (quarter of this bottle) down waste and leave approx 30 minutes for the product to work. By this time the blockage should be clear, then flush away with water.

**KITCHEN: Sink wastes:** The common cause of running/blocked wastes in sinks is fats, grease and food particles. **Sinks, Showers & Baths** will break down the blockage leaving clean and free flowing pipes. Gently pour 250ml-500ml directly into waste pipe and leave to work for approx 30-45 minutes. By this time the blockage should be clear, then flush away with water. *Avoid contact with stainless steel, chrome/plated metal fittings to prevent tarnishing.*
