Barrettine 250ml e

REMOVES LIMESCALE QUICKLY

Please read instructions before use. Do not mix with other chemicals. Use in a well ventilated area. Wear appropriate personal protective equipment (PPE) such as chemical resistant gloves, overalls and eye/face protection to protect against splashes. If in doubt speak, to your PPE supplier and show them this label/product, or call us for further advice.

DIRECTIONS

KETTLES (Metal or Plastic) Half fill kettle with water and bring to the boil. Unplug and stand kettle in an empty sink. Add one third of this bottle (approx 80ml) and leave for 5 minutes or until effervescence stops. Pour away contents, rinse thoroughly and wipe clean. Refill with fresh water, boil and rinse again. Heavily scaled kettles may require second treatment.

SHOWER HEADS Mix 1 part Descaler with 8 parts warm water in a suitable container. Detach shower head from hose and immerse until scale disappears. Rinse the shower head and container before re-use.

STEAM IRONS Warm the iron, then unplug. Mix solution 1:8 as above and pour into the water chamber. Set control knob to 'steam'. Holding the iron over a sink or bowl, allow mixture to drain through steam holes, shaking gently if necessary. Briefly operate steam/spray buttons. When empty, rinse through twice with water and wipe sole plate clean.

COFFEE MAKERS Assemble as usual, but without filter paper. Mix 1 part Descaler with 8 parts water and pour into reservoir. Switch on and allow the mixture to complete the percolating cycle. Empty and repeat process twice with fresh water.

FOR ALL APPLIANCES, REFER TO MANUFACTURER'S HANDBOOK.
