

**PREMIER NOURISH & PROTECT
CLEAR UNIVERSAL+ WOOD PRESERVATIVE**

WOOD PRESERVATIVE FOR AMATEUR/PROFESSIONAL USE AGAINST WOOD ROTTING FUNGI, WOOD STAINING FUNGI AND WOOD DESTROYING INSECTS.

PRODUCT DESCRIPTION:
Nourish & Protect Clear Universal+ (NPCU) is an oil/spirit based ready to use product. It contains active ingredients effective against wood destroying and wood discolouring fungi as well as against wood boring insects. NPCU penetrates wood easily and thereby gets deep into inner layers. It is moisture regulating and provides an adhesive surface suitable for glues, fillers, and solvent or water-based finishing treatments such as paints, varnishes, stains etc.

RANGE OF USE:
Suitable with topcoats for outside applications including joinery in external walls such as doors, windows and their frames (inner & outer surfaces), facades, carports, shutters and balcony railings. Also for use on wood in unoccupied areas such as ground floor joists or where wood is resting on the ground / hardstanding and only submitted to intermittent wetting (rain) such as garden products. It is not suitable to treat wood for any in-ground use or where the wood is permanently subjected to continual wetting (streams, ponds etc). For a more comprehensive listing of suitable applications click 'Product Information' tab at www.barrettinePro.co.uk

INSTRUCTIONS FOR USE:
READ ALL PRECAUTIONS & THE FULL LABEL BEFORE USE
Wood surfaces must be clean and dry before treating.

New wood: Generally no pre-treatment necessary, but if contamination suspected use a fungicidal wash such as Knockout Mould & Mildew Cleaner.

Renovation: All coatings should be completely removed. Pre 1960's paint may contain lead, take special precautions. If necessary grey or deteriorated wood should be sanded down to a clean, sound surface. Wipe surface to remove dust with Barrettine White Spirit or Methylated Spirits.

Application method: **Amateur:** BRUSH AND ROLLER.
Professional: BRUSH, DIP AND ROLLER.
Protect environment (e.g. Soil, plants, aquatic environment) from splashes of NPCU. Do not apply in damp conditions or if rain is imminent.

Application temperature: Ideally between 10 – 30°C. Wood should be frost-free when treated.

Amateur / Professional uses: Shake Well
Application of this product will affect absorption characteristics of any wood dye / stain to be subsequently applied. Test on off-cuts to determine process for obtaining desired shade. Apply using a synthetic brush designed for solvent borne products, spreading out thinly and evenly, ensure end grain is thoroughly treated along with cut and drilled areas. Reseal container after use.
Number of coats required: 2-3, depending on wood species and surface characteristics. Allow 6-12 hours drying time (touch dry) between coats. Some darkening of the wood may occur with successive applications of this product.

Coverage: Effective against wood destroying fungi, blue stain and wood boring insects at 5m² per litre.

Drying time: 4-6 h under normal conditions (20°C/65% rel. humidity). Low temperatures, increased humidity and ingredients of some wood types may increase drying time. Allow a minimum of 24 hours drying time under normal conditions before application of a top coat.

Cleaning of tools: Clean tools immediately after use with Barrettine White Spirit or Brush Cleaner.

Subsequent surface treatment: NPCU treated timber when dry (minimum 24 hours) must be coated with an appropriate topcoat for use in situations where it will be exposed to weathering. Barrettine All in One Decking Oil, Log Cabin Treatment, paint or varnish/sealer (solvent or water based) will extend protection. If an additional top coat is used, allow 24 h drying time under normal conditions before any top coat is applied.

COMPATIBILITY: Overcoating of wood treated with NPCU Treatment is possible with most commercial solvent or water based final top coats. However, compatibility and adhesion should be tested in a sample area first.

FIRST AID MEASURES:
AFTER SKIN CONTACT: Take off immediately all contaminated clothing, and wash skin immediately with plenty of water and soap. Obtain medical attention if symptoms occur.
AFTER CONTACT WITH EYES: Rinse immediately with plenty of water and seek medical advice if symptoms occur.

IF SWALLOWED: Rinse the mouth with water and give small amounts of water to drink (not in the case of loss of consciousness). Do not induce vomiting unless expressly instructed by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if symptoms occur.
AFTER INHALATION: Move the exposed person into fresh air. Keep person warm and at rest. Provide artificial respiration by a trained person if breathing is irregular or arrested. It may be dangerous to the person providing aid by mouth-to-mouth resuscitation. Seek medical advice if symptoms are severe or long lasting. If unconscious, place in recovery position and get medical attention immediately.

IN GENERAL: Show this label if medical advice is needed.

PRECAUTIONARY INFORMATION: USE ONLY AS DESCRIBED ON THE LABEL. The precautions generally recommended for handling wood protection products should be observed, e.g. Wearing of protective clothing, safety goggles and protective gloves (e.g. Nitrile rubber gloves). When using do not eat, drink or smoke. Handle product and dry freshly treated wood in areas with good ventilation. Keep freshly treated wood roofed or otherwise protected against rain until complete dryness. Do not breathe sanding dust. During application to in situ timbers and whilst surfaces are drying do not contaminate soil and surface waters with product. Do not empty into drains. Do not allow this product to reach aquatic environments, the ground or the sewer system. For Professional use, freshly treated timber must be stored after treatment under shelter or on impermeable hardstanding to prevent direct losses to soil or water and that any losses must be collected for reuse or disposal.

**SHAKE WELL
BEFORE & DURING USE FOR AT LEAST 1 MINUTE**

STORAGE: Store product in tightly closed original containers at temperatures above 0°C and below 30°C.
DISPOSAL INFORMATION: Completely empty cans can be recycled as normal. Dispose left over product in the original container in compliance with local regulations. Do not dispose product residues or cleaning wastes into the sewer system (drains), into waterways or into the soil. Do not reuse empty containers.

European Waste Code (EWC)-Code
03 02 02: Organochlorinated wood preservative.
20 01 27: Municipal wastes (household waste and similar commercial, industrial and institutional wastes) including separately collected fractions : paint, inks, adhesives and resins containing dangerous substances.

**STATUTORY CONDITIONS OF APPROVAL RELATING TO USE
FOR USE ONLY AS A WOOD PRESERVATIVE**

FOR USE ONLY BY AMATEUR / PROFESSIONAL OPERATORS. READ ALL PRECAUTIONS BEFORE USE. **HSE No. 10809**
Users must comply in full with all their legal responsibilities under the control of Pesticides Regulations 1986 (as amended), including complying with all Conditions of Approval.
APPLICATION RATE:
BRUSH/ROLLER: 5m² OF TIMBER SURFACE PER LITRE.
DIPPING (Professional Only): DIP TIMBER IN PRODUCT FOR AT LEAST 3 MINUTES.

PRESERVER RISK MITIGATION MEASURES

This material and its container must be disposed of in a safe way. DO NOT CONTAMINATE FOOD STUFFS, EATING UTENSIL OR FOOD CONTACT SURFACES. WASH HANDS AND EXPOSED SKIN before meals and after use. KEEP IN A SAFE PLACE. UNPROTECTED PERSONS AND ANIMALS SHOULD BE KEPT AWAY FROM TREATED AREAS FOR 48 HOURS OR UNTIL SURFACES ARE DRY. AVOID ALL CONTACT WITH PLANT LIFE. COVER ALL STORAGE WATER TANKS before application. ALL BATS ARE PROTECTED UNDER THE WILDLIFE & COUNTRYSIDE ACT 1981. BEFORE TREATING ANY STRUCTURE USED BY BATS, CONSULT NATURAL ENGLAND, SCOTTISH NATURAL HERITAGE OR THE COUNTRYSIDE COUNCIL FOR WALES. HAZARDOUS TO BEES. DO NOT USE ON BEEHIVES OR BEE KEEPING EQUIPMENT. 3-IODO-2-PROPYNYL-N-BUTYL CARBAMATE is carbamate compound which has weak anticholinesterase activity. DO NOT USE if under medical advise not to work with anticholinesterase compounds. FOR OUTDOOR USE and use on wood in unoccupied areas such as ground floor joists. Also for use on windows/frames, external doors/frames (internal & external sections). **ADDITIONAL RISK MITIGATION MEASURES FOR USE BY PROFESSIONAL OPERATORS**
Avoid excessive contamination of coveralls. The COSHH (Control of Substances Hazardous to Health) Regulations 2002 (as amended) apply to the use of this product at work. Refer to www.hse.gov.uk/pubns/guidance/sseries.htm
ACTIVE INGREDIENT: 3-Iodo-2-propynyl butyl carbamate (IPBC) 0.50% w/w, Tebuconazole 0.22% w/w and Permethrin 0.06% w/w.
EXPIRY DATE: 2 years from production date.
OUT OF HOURS EMERGENCY TELEPHONE NO. +44 (0) 1270 502891

HEALTH, SAFETY & ENVIRONMENTAL INFORMATION

Contains: Hydrocarbons, C10-C13, n-alkanes, isoalkanes, cyclics, < 2% aromatics; 3-iodo-2-propynyl-n-butyl carbamate 0.50% w/w; Tebuconazole 0.22% w/w; Permethrin 0.06 % w/w

May be fatal if swallowed and enters airways. Very toxic to aquatic life with long lasting effects. If medical advice is needed, have product container or label at hand. Keep out of reach of children. IF SWALLOWED: Immediately call a POISON CENTER, a doctor. Do NOT induce vomiting. Collect spillage. Store locked up. Dispose of contents and container to a hazardous or special waste collection point. EUH208 - Contains permethrin (ISO); m-phenoxybenzyl 3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate(52645-53-1), 3-iodo-2-propynyl butylcarbamate; 3-iodoprop-2-yn-1-yl butylcarbamate(55406-53-6). May produce an allergic reaction.
Use biocides safely.
Always read the label and product information before use.

VOC limit value for this product (Cat A/h): 750g/l (2010).
This product contains < 750g/l VOC

For full instructions,

The following colours are also available
in our Wood Preserver Range.

The colour swatches are an indication only and representative of the product applied to clean new/pale timber. The final colour finish can vary considerably due to the age, type & condition of the timber being treated. We always recommend carrying out a test area first in an inconspicuous area to make sure you are happy with the final dried colour.
