

Armourflex Pure & Natural Tung Oil is a completely natural, additive-free oil, ideal for food-safe surfaces like kitchen worktops, children's toys, and furniture. Pressed from the seeds of the Chinese Tung tree, this wood oil is undiluted by solvents or additives. It will provide a nourishing treatment that richly enhances the natural colour of bare wood and dries to a matt finish. Armourflex Pure & Natural Tung Oil offers excellent water and stain resistance, adapting to the wood's natural movement.

Ensure wood is clean and dry. For best results on bare wood, thin the first coat by diluting 50% with white spirit to ensure good absorption. To ensure the whole process is 100% plant based, thin first coat with Genuine Turpentine rather than white spirit. Allow this to penetrate the wood for 20-30 minutes, then wipe away any excess with a lint-free cloth. For subsequent coats, apply the undiluted oil. Whether the project is indoors or outdoors, 3-4 coats are required overall. As an all-natural product with no added drying agents, allow 1-3 days between coats for optimal results.

Tung Oil provides a natural, low-sheen finish. To achieve a refined look, lightly buff the dried surface with very fine (000) grade wire wool.

Armourflex Tung Oil Overview

- 100% Natural, non-toxic & safe to use.
- Natural drying oil without need for artificial driers.
- Highly resistant to water & food stains.
- Helps to prevent drying & deterioration of wood.
- Also known as China Wood Oil.
- Dries to a natural, matt finish.
- Apply with a brush or lint free cloth.
- Drying time of 24 hours.
- Coverage: 20m² per litre.
- Coats: 3 coats to bare wood.
- Re-coat: 1-3 days.
- Maintenance: Once a year, or when wood shows signs of drying.
- Clean with a soft cloth & mild detergent.

Armourflex Tung Oil Uses

Being a natural oil, Tung Oil is safe to use in all environments and on all types of wood, including:

- Hardwoods & softwoods
- Food surfaces, kitchen worktops & dining areas
- Kitchen utensils
- (Children's) furniture & toys
- Doors & windows
- Hardwood floors
- Turned wood
- Untreated timber & bare wood

Drying Time: Tung Oil doesn't contain any added drying agents or thinning agents. Tung oil typically requires 1-3 days to dry between coats, depending on factors like temperature, humidity, and wood type. It is a slow-drying oil, so allowing ample time between coats is essential for proper curing. For best results, the final finish may need up to 7-10 days to fully cure, achieving its optimal hardness and water resistance.

Colour: Tung oil enhances the natural beauty of wood by deepening its colour and highlighting its grain. It typically adds a rich, warm tone with a golden to amber hue. This colour change is more pronounced on lighter woods, where Tung oil can give a subtle darkening effect, while darker woods experience more depth and richness without significant colour shift. Always test an inconspicuous area before starting any project to check product suitability, compatibility and final dry colour.

After Use: Clean equipment with Barretine White Spirit. Replace cap firmly. Store between 5-30°C, away from heat and flames. Immediately wash all soiled cloths with soapy water and dispose of safely outside the house.

Tung oil is ideal for those who want a natural, matt finish and are willing to invest time in application and maintenance. If you are looking for a quicker, more durable finish with a semi-gloss sheen then why not use Barretine's Danish Oil, which is better suited for everyday furniture.

Health & Safety Information: Keep out of reach of children. Do not leave soiled application cloths where they may constitute a fire risk, as they are liable to spontaneous combustion. As a refined natural product, Tung Oil may be unsuitable for sensitive individuals with allergies to nuts or seeds. Always store upright.
