

Read entire label before opening this product. Before use test a small, inconspicuous area to confirm compatibility with the paint system and substrate below.

A highly effective paint stripper to remove many types of coatings, including most metallised paints. Gel consistency, ideal for vertical and less accessible areas both indoors and outdoors. Ensure indoor ventilation by opening windows/doors. Non caustic, no neutralising required, methylene chloride/dichloromethane free.

**Instructions:**

- Lightly scoring the surface may improve the performance, providing no pre-1960s paint.
- Protect nearby areas from overspill with impermeable sheeting.
- Pour some product into a suitable non-plastic container (e.g glass jar), and replace cap.
- Select an area <math>< \frac{1}{2}</math> m<sup>2</sup> at once, or product may dry out before removal.
- Brush a generous layer of Paint Panther onto the surface and leave for 15 minutes.
- Check if paint can be removed with a scraper. Some coatings will soften without blistering.
- If required, use a brush to open blisters and apply more product, then leave for a further 15-30 minutes. Do not allow to dry out.
- Remove softened coatings with a shavehook or stripping knife, using a stiff bristled brush for awkward areas. Collect waste and allow to dry for several hours e.g. on newspaper.
- Reapply as necessary to remove all remaining coatings.
- Wipe the surface clean with Barretine White Spirit or water. Water may raise the grain on wood substrates - once dry, smooth with fine sandpaper or fine steel wool before redecorating.
- Remove as much product as possible from equipment, then wash with warm soapy water.
- Dispose of waste via an appropriate route. If in doubt contact your local authority, do not empty product into drains or watercourses.

**Substrates:**

Suitable	Not Suitable
Wood	Plastic
Stone/Masonry	Acrylic
Metal	PVC
Glass	Vinyl

**Coverage:** 500ml treats approximately one side of a standard door (1.5m<sup>2</sup>), depending upon the number and type of paint layers. Ensure the lid is secure and store upright. Store/use between 5-25°C, out of rain and direct sunlight. Shake container well before use.

**Lead Paints:** Pre-1960s paint surfaces should be prepared with caution as they may contain harmful lead.

**Caution:** Highly flammable, ensure working areas are well ventilated at all times to avoid the build-up of explosive vapours. Do not use near naked flames or in conjunction with a heat guns or blow torches and do not smoke. Wear appropriate personal protective equipment (PPE) such as chemical resistant gloves, overalls and eye/face protection to protect against splashes and replace if contaminated. If in doubt speak to your PPE supplier and show them this label/product or call us for further advice.

**Health, Safety & Environmental Information**

Contains: Hydrocarbons, C9-C11, n-alkanes; isoalkanes, cyclics, < 2% aromatics; 1,3-dioxolane; MEK (METHYL ETHYL KETONE), BUTANONE; Propylene glycol methyl ether; Alcohols, C9-11 ethoxylated, < 2.5 EO. Highly flammable liquid and vapour. Causes serious eye damage. May cause drowsiness or dizziness. If medical advice is needed, have product container or label at hand. Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid breathing fume, vapours. Use only outdoors or in a well-ventilated area.
